

Office of Indian Energy and Economic Development Division of Energy and Mineral Development

- The National Indian Oil and Gas Evaluation Management System -

The National Indian Oil and Gas Evaluation Management System (NIOGEMS) application, developed and managed by the Division of Energy and Mineral Development (DEMD), provides a computer-based application designed to help Indian Tribes and federal offices develop and manage their energy and mineral resources. In support of those activities, tribal and federal resource managers need to readily access complex natural resource, realty, and geo-technical information and financial data.

NOTE: This application is not available to the public.

NIOGEMS Application...

- An easy-to-use, map-oriented computer application for users to view and locate certain energy and mineral production data, lease information, and other related data
- Combines energy and mineral data from different systems into a single, user-friendly system
- In use by 170 users at 38 sites on 12 reservations in support of energy and mineral, realty, planning, and taxation functions
- A productivity increase of 10 to 1 has been reported by the Wind River Agency when performing several realty functions

NIOGEMS is here to assist in your energy and mineral management needs.
